Guarantees to Advertisers a Larger Local Circulation than that of Any Other TWO St. Louis Newspapers Combined.

TWENTY-EIGHT PAGES.

SUNDAY, NOVEMBER 15, 1891.

Weather forecast for twenty-four hours, beginning at 8 a. m. to-day, for Missouri: Cloudiness and local rains; winds generally southeasterly; clear by Monday, with rains.

DIRECTOR CUDMORE has been "vindicated" by President BARTHOLOMEW.

PRESIDENT BARTHOLOMEW has injected a strong odor of lime into the atmosphere of the new School Board.

IS PRESIDENT BARTHOLOMEW's action in making up the Building Committee an indication of what he will do when he is called upon to name an investigating committee?

PERRAINS the Chilian authorities would consent to permit the refugees in the American Legation to escape if they were assured that EGAN would go with them. This plan of solving the difficulty is worth trying.

MONEY is not all-powerful in elections. The New York candidate who paid the largest sum into the campaign fund got his experience for his gold. The other fellow got the votes and the office. This is very disgusting to those who hold that politics is largely a matter of finance.

THE plan of compelling street car corporations controlling several lines to give transfers to passengers as a part of the price of valuable franchises is a fair and reasonable measure in the interest of the public. The Municipal Assembly should respect the demands of the people in this matter.

ARKANSAS will not reach the depth of subservience to partisan bias attained by Pennsylvania until it makes a United States Senator and supreme political leader of Woodruff. At present there is no evidence of a movement among the Arkansas Democrats to follow the example of the Pennsylvania Republicans.

An investigating committee closed its labors in Montreal only a day or two ago, the sixth or seventh since Sir JOHN MACDONALD's death. Another is proposed with the definite object of fixing guilt on Mr. MERCIER, the Premier of the French Province of Quebec. What a time DIOGENES would have had in Canada!

LIPKEND STUART, the Republican candidate for the State Senate of New York, expended \$9,935.50 in his campaign, nearly \$3,000 more than was expended by Mr. FLOYD, the Democratic candidate for Governor. This is a record for the State of New York.

THE EMPEROR FRANCIS JOSEPH of Austria is an amiable man who always says the right thing to the right people, and is so considerate that he never discusses capital punishment with the man whose father was hanged. His assurance to the delegation from the Peace Congress that he favored arbitration and other mild remedies for insoluble difficulties were agreeable and timely, and give rise to an excited opinion of his urbane and theoretical morality. It is a curious fact, however, that he was dressed for the occasion in the brilliant uniform of a professional homicide.

THE Chicago police appear to have blundered again in their attempt to run down anarchists in the Windy City. They broke up several meetings and arrested participants in them because they believed that the meetings were being held to propagate anarchistic doctrines and promote conspiracy against the authorities. Now that they have to make peace against the prisoners and justify their conduct they find themselves in difficulty. The rights of free speech and of public meeting are guaranteed to all citizens, no matter what their opinions may be, and every assault upon those rights surely offends the An-

archists a pretext for the denunciation of governmental authority and an argument for effective use among the ignorant and discontented. The folly of the Chicago police is affording excellent aid to the Anarchists.

PRESIDENT BARTHOLOMEW'S SLUR.

President BARTHOLOMEW's appointments to the Building Committee of the School Board realize the fear expressed by the POST-DISPATCH that his election embodied a substantial victory for the remnants of the crooked combine, and afford strong evidence that his pledges of a genuine reform administration are practically worthless.

His make-up of this committee may be taken as the key to his attitude with reference to the popular demand for the investigation of the record of the old board, the exposure of the crooked work of the board, the punishment of the guilty rulers of the school funds and a complete change of method in building and repair transactions. This is the most important standing committee of the board. It is the committee through which nearly all the crookedness uncovered by the POST-DISPATCH was worked. Yet Mr. BARTHOLOMEW has named for it an overwhelming majority of hold-over members of the late board, five out of seven, and three members of the old committee, one of whom has been shown to be one of the worst members of the crooked gang and to have grossly abused his office to enrich himself and his brother.

It is needless to consider the material of the other committees in view of this slum of the President. The appointment of CUDMORE on the Building Committee after the exposure of his conduct is an affront to honest citizens and an outrage upon the decent sentiment of the community. The action of Mr. BARTHOLOMEW cannot be justified by any plea. His Building Committee is the first of the "Dead Sea fruits" of the alliance of BROCKMAN, WAIT and COLLINS, who were pledged to reform, with survivors of the ring to place him in the President's chair.

The honest members of this committee and of the board can, however, checkmate attempts at crooked work if they do their whole duty fearlessly, and the POST-DISPATCH will keep a vigilant eye on the proceedings.

MORAL DISTINCTIONS.

In one of the magazine articles he is so fond of writing Mr. HENRY CABOT LODGE makes the rather startling assertion that the question of free trade or protection is not one of morality. Mr. LODGE is one of those individuals, unfortunately too common, who think that conscience should not intrude in the transactions of commerce, and that politics should not enter into any entangling alliance with righteousness. According to this view moral considerations blind the intellect, pervert the judgment and mislead men as to the true aim of politics, which is to realize the greatest amount of pure plunder.

Probably many of these gentlemen would repudiate such a doctrine if applied to their private life, but they all seem to have limber intelligences and supple consciences. They will admit that it would be wrong for one man to coerce another on the highway and deprive him of his earnings. They will agree that a moralist might properly enlarge on such a transaction. But if the coercion is applied through an act of Congress in such a way that the victim is not directly conscious of it—that is quite a different matter; that is a business or political transaction; that is a business or political transaction. In the first case a moral standard is applied, in the second it is exchanged for another, called expediency. An act of Congress declares that the distinctions of man and man are not moral distinctions if made in accordance with its provisions. In this way conduct which is said to be three-fourths of life is placed upon a purely rational and business basis. It has long been conceded that legislatures cannot confer good moral character upon a man, but it appears from this that they can make it unnecessary for him to have a moral character of any kind.

Mr. LODGE's case shows how the devil works upon good men's minds. He does it by the skillful use of words. When the victim under coercion of the highwayman gives up his purse he is plundered. When the same individual pays an artificial price for articles of necessity to persons who possess coercive power by virtue of the law he is protected. The one raises a question of principle and morality, the other one of policy. No doubt the policy is an excellent one for the man who profits by it, but in spite of its excellence the victim is not able to see wherein plunder differs from protection.

CHECKING VOTE BRIBERY.

The statements of campaign expenditures made by candidates under the New York corrupt practices act emphasize the point which has frequently been urged by the POST-DISPATCH that such a law is not thoroughly effective unless campaign committees are made responsible for their conduct and are compelled to make sworn statements of their receipts and disbursements.

The largest items in the list of expenditures submitted by most of the candidates were the sums paid to the party committees. One Republican candidate for the State Senate paid over \$4,000 to his party committee, and the aggregate of the sums thus placed at their disposal was enormous. This large amount of money was used by irresponsible political organiza-

tions, not held accountable under the law for the manner of its expenditure to influence voters. The loophole thus afforded for the corrupt use of money in elections is plain. The candidates are enabled to avoid responsibility for, although profiting by, the corruption of voters through the agency of others.

The corrupt practices act, therefore, as the experience of New York demonstrates, which fails to hold campaign committees to strict accountability for election disbursements has a fatal defect. It does not check, but merely diverts into certain channels the stream of bribe-money poured into elections. To make a measure of this kind complete, however, not only should all campaign agencies be held responsible for expenditures, but the expenditures should actually be limited to reasonable sums for legitimate purposes, a provision which experience in England has proved both practical and effective.

One of the political possibilities of the coming six months is a coalition in several Republican States between the Democracy and the Alliance through which several electoral votes can be secured for the Democratic candidate. The rumors of such a fusion in Kansas are followed by more definite information from Minnesota. Whether or not such a union can be accomplished the possibility of it is worth keeping in mind, for if it does not occur in the next campaign it will come in the future. It is, perhaps, the quickest way to rescue the country from the "pivotal State" domination which has bred corruption for so many years. It will be a happy day for this country when elections shall cease to be decided by the use of money in one or two purchasable States.

PRESIDENT HARRISON is so astounded at the roaring prosperity of this nation that he refuses to believe it is due to natural causes and refers it to a beneficent Providence which has the United States in special charge. It must be admitted that we are prosperous, and as the President's party has done what it can to keep the growing wealth in the hands of the "better classes," we have reason to agree with him that Providence has interfered to save a little of the milk and honey for the "lower classes," for us plain people. But in thus crediting our basile condition to supernatural causes, is not the President guilty of disloyalty to his party? It is the current impression in high Republican circles that it is all on account of the McKinley bill.

SECRETARY FOSTER's assertion that the recent bank failures do not prove that the system is defective or that the Commissioner is at fault, is true as to the first and false as to the second part. The system is acknowledged to be effective, and has hitherto worked about as well as most human devices. If the system had been adhered to and the examiners and Commissioner had done their duty the disasters would not have been public scandals. Both the Keystone and the Maverick Banks were known to be rickety before the failure was announced, and it is said that the authorities at Washington were aware of the danger. If the Commissioner did not fail in his duty, who did?

THE President's welcoming speech to Senator MORTON, the Chilian Minister was cordial in its tone, as became a diplomatic utterance, but it contained a very curious passage concerning "tempting commercial and political advantages" which, it may be gathered, had been offered by one or both parties in the Chilian difficulty. It seems to be an admission that corruption had been attempted but had been repelled by the virtuous and high-minded gentlemen at the head of the American State Department. It is a very remarkable passage, a curiosity, in fact, and it would be highly interesting to know just how and how much it means.

A CONTRAST between two citizens of Joplin over the ownership of a dog was recently decided in court. The costs, not counting attorney's fees, amounted to \$50 and the jury valued the dog at 1 cent. After figuring out the loss they have incurred by not agreeing to stay the dog and divide him the two Joplinites are probably wondering how they managed to escape the fool-killing.

WE publish this morning a story by Mrs. ROSA BOWEN, who is well-known and very popular in St. Louis society. It is the lady's first plunge into literature, but in it can be found both promise and performance. It is a story of the last theatrical season. Mrs. BOWEN's story is well constructed and well told. Mrs. BOWEN's story is to be congratulated on the success of her first venture.

COMMISSIONER RATH has joined the purity party and won't have any décolleté writers in his department. The two St. Louis authors who have shocked the old gentleman into giving them a valuable advertisement cannot probably afford to retire from their salaried positions and live on the profits which the pure man's published consternation assures them.

By "UNCLE JERRY" RUSK finds that his rain-making scheme won't work well enough to make a fair show for the money invested, he might apply to some manager of a realistic drama and get a few points about it. The stage rain-makers have been giving entire satisfaction to the public for a long time.

As an illustration of the ease with which revolutionary scares are caused in this city it is related that a panic was once caused in Rio de Janeiro by the breaking of a lot of barrels. There is nothing remarkable about this. The breaking of a lot of "barrels" is likely to create a panic in any country.

BEATS THE WORLD.

The Armor Plate Produced by American Manufacturers.

RESULT OF THE TESTS MADE AT INDIAN HEAD GROUND.

Gov. Francis Indorsed in His Controversy With Mr. Ewing—Far-away Harrison Receives a Gift From Far-away Harrison—Statistical Matters From the Department—Personal and General Notes.

WASHINGTON, D. C., Nov. 14.—The armor plate test made at Indian Head, Md., today, under the direction and for the information of the Ordnance Board, was satisfactory in the extreme, bearing out the results of the theoretical work which the Ordnance Bureau of the Navy has been proceeding during the past year. Prior to the production of improved armor plate by American manufacturers the nickel steel creusate plate produced in France was found to have the qualities of resistance, coherence and elasticity combined to a greater degree of perfection than had ever before been secured in naval construction.

During the past year the Ordnance Bureau of the Navy has been proceeding during the past year. Prior to the production of improved armor plate by American manufacturers the nickel steel creusate plate produced in France was found to have the qualities of resistance, coherence and elasticity combined to a greater degree of perfection than had ever before been secured in naval construction.
